

BIO

I am a creative professional with a passion for creating brand and web experiences that make an impact.

Focusing on clean, user-friendly, grid based design, applying consistent messaging and visual language across all media types.

Helping clients stay up-to-date on the newest web technology and design trends to create with websites of beauty.

For the past 7+ years I have been involved in 100+ projects ranging from small to large well-established companies, creating everything from apps, websites, UI, branding, brochures, business cards, video & photo editing and email marketing.

Hobbies

I'm naturally a tech geek and loves anything to do with computers and devices. When I'm not pushing pixels and learning all there is about web you can find me travelling around Asia, studying Japanese and dabbling in photography.
